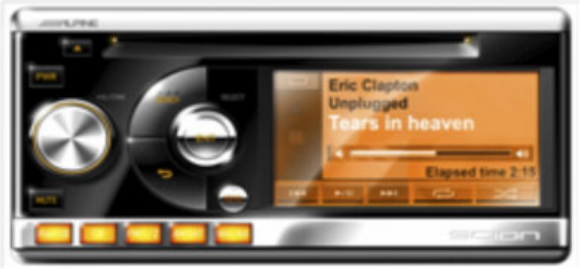
SCION XB

ALPINE CD DECK



The Alpine™ Premium Audio System delivers a power full 340 watts for XB (eight dynamic speakers). Featuring built-in HD Radio™ for superb sound quality, the system includes Scion Sound Processing® (SSP), including three sound reproduction pre-sets (“Natural”, “Hear” and “Feel”). There’s a USB port for connecting jump drives and digital audio players like iPods[â1] and iPhones[â1]. The system features MP3, WMA™, AAC capability and an auxiliary port for connecting older-generation digital audio players. A touch screen LCD Thin Film Transistor (TFT) display features precision graphics and three 2.4-volt RCA outputs for front, rear and sub-speaker systems allow users to add external amps and subwoofers to boost power. Available coast-to-coast XM®[2] satellite radio coverage (with accessory satellite radio tuner, antenna and monthly subscription) completes this awe-inspiring audio soundstage.

BLUETOOTH HANDS FREE CALLING

The BLU Logic®[1] Hands-free System integrates with the factory audio system to initiate and answer cellular phone calls, enabling cell phone use that is essentially “hands free.” A small microphone designed to capture the voices of vehicle occupants is provided, while owners listen to incoming and outgoing cellular calls through the front factory speakers. Incoming calls are answered with the push of a button. Outgoing calls are placed by cellular phone dialing and speaking into the fixed microphone. The sound level of incoming calls is easily adjusted up or down with simple clearly identified button functions. The system also delivers music streaming capability on most enabled phones.

NAVAGTION HEAD UNIT

The Alpine Premium Audio System delivers 200-watts of maximum power through six optimally placed dynamic speakers for truly outstanding sound quality. Featuring built-in HD Radio for superb sound quality, the system also includes Scion Sound Processing® (SSP), which includes three sound reproduction pre-sets for three ways to listen ("Neutral," "Hear" and "Feel"). There's also a USB port for connecting jump drives and digital audio players like iPods[1] and iPhones. Plus, the system features MP3, WMA™, and AAC capability, as well as an auxiliary port for connecting older-generation digital audio players. Additional features include a touch screen LCD Thin Film Transistor (TFT) display featuring precision graphics and three 2.4-volt RCA outputs for front, rear and sub-speaker systems—allowing users to add external amps and subwoofers to boost power and expand the sound field. Available coast-to-coast XM®[2] satellite radio coverage (with the accessory satellite radio tuner, antenna, and paid monthly subscription) completes the picture of an awe-inspiring audio soundstage.

TRD PREFORMANCE EXAUST

Helping to deliver a measurable increase in performance, the TRD sport muffler boosts horsepower while providing a deeper and more resonant engine sound that enhances both the presence and appearance of the vehicle. Constructed entirely of stainless steel, the TRD sport muffler is emissions legal in all 50 states, meets all noise limit requirements and features a polished muffler with a double-walled, wide-diameter slant-cut exhaust tip and rolled edge. Plus, the TRD logo is etched on both sides of the high-polished exhaust tip.

WHEEL LOCKS

Constructed of hardened steel with triple-nickel chrome plating, Scion wheel locks help provide inexpensive, dependable protection against wheel and tire theft—along with peace-of-mind in knowing wheels and tires are secure. Wheel locks can save vehicle owners the time and expense of replacing their wheels and tires, while also helping protect against additional vehicle damage that can occur during theft. Not to mention protection from being stranded away from home or having to pay out-of-pocket insurance deductibles. Wheel locks are available in kits of four.

TRD SUSPENSION UPGRADE SET

Race-inspired TRD performance shocks enhance the xB's performance by helping provide a firm, well-managed ride without excessive harshness. Sport-tuned specifically for the xB, these twin-tube, high-strength shocks and struts use more aggresive valving to reduce body roll, resulting in overall enhanced response and cornering performance. Plus, a shorter strut cartridge improves wheel travel. TRD performance shocks are designed to work with either stock springs or TRD lowering springs—and complement TRD performance wheel/tire combinations, making them the ideal choice for extreme street applications.

AUTO DIMMING MIRROR

The automatic-dimming inside mirror relieves drivers from enduring the full glare of headlights from vehicles behind them through the use of two sensors attached to the mirror: a forward-facing light detection sensor, which detects the lighting conditions surrounding the vehicle; and the rear light detection sensor, which detects the light that strikes the inside mirror from behind the vehicle. During nighttime driving, if a difference in intensity exists between the surrounding light and the light reflected off the inside mirror, the auto-dimming feature automatically reduces the reflection rate of the inside mirror to dampen the glare and improve the driver's rear view. The inside mirror also features an amber-colored Light Emitting Diode (LED) console light on the underside of the mirror to illuminate the gearshift area.
